Atlanta, GA (Remote) | 619-361-3592 | dara.thomas.grc@gmail.com | [linkedin.com/in/daraffthomas](https://www.linkedin.com/in/daraffthomas) | github.com/DaraStaysCurious

GRC Analyst | CompTIA Security+ Certified

Security+ certified professional transitioning into cybersecurity from a background spanning occupational health & safety, UX design, and risk management. My throughline across all three: unsafe behavior is a system design failure, not a human failure. Skilled in risk assessment, root cause analysis, and stakeholder communication — pursuing AWS Cloud Practitioner and CGE-P (Certified GRC Engineer – Practitioner).

CERTIFICATIONS

CompTIA Security+ | AWS Certified Cloud Practitioner (in progress) | Certified GRC Engineer – Practitioner (in progress)

EXPERIENCE

Independent Consultant — UX Strategy & Process Risk Assessment | Remote

01/2020 – Present

- Conducted UX research and design consulting for B2B SaaS clients, applying risk-assessment and process-analysis methods drawn from an OHS background to surface usability and workflow risks other consultants missed
- Led stakeholder assessments and audits to identify process gaps and compliance concerns, presenting findings and recommendations directly to client leadership
- Partnered with product and engineering teams across 30+ client engagements, redesigning workflows that reduced user-reported errors or support volume by an estimated 35%
- Adapted OHS risk-assessment methodology (Fine-Kinney scoring, Five Whys root cause analysis) into repeatable frameworks for digital product risk — later formalized into the GRC portfolio case studies on GitHub

Sr. UX Designer, Child Care Aware of America | Arlington, VA (Remote)

11/2023 – 02/2025

- Analyzed business processes and stakeholder requirements to identify risks and process gaps on a large-scale childcare application platform, informing product decisions that reduced downstream compliance and usability risk
- Led design for 7 major platform features supporting childcare providers and families at national scale, coordinating across engineering, policy, and compliance stakeholders
- Conducted usability testing and stakeholder interviews that surfaced 4 critical workflow risks prior to launch, enabling remediation before rollout
- Documented design decisions and process changes supporting internal compliance and audit readiness for a platform handling sensitive family and childcare data

Associate UI/UX Designer, Point B | Portland, OR (Remote)

08/2021 – 10/2022

- Led process assessments and workflow analysis on an employee training platform, identifying operational gaps that informed platform redesign priorities
- Facilitated stakeholder workshops with 8 cross-functional teams to map existing training workflows and surface friction points
- Contributed to redesigned training flows that improved completion rates or reduced support requests by an estimated 27%

Operations & Community Impact Roles | Multiple Employers | San Diego, CA / Atlanta, GA

2017 – 2020

- Brinks Plumbing Services (2017–2018) — Coordinated maintenance operations and dispatch across multiple apartment complexes; managed accounts payable and vendor coordination
- United Way of San Diego County (2018–2019) — Conducted 80+ stakeholder interviews and 100+ program assessments to inform data-driven funding and outreach decisions
- Robert Half Agency (2019–2020) — Logged and resolved 60+ weekly client shipment issues, coordinating cross-functional teams across 15 dispatchers

Immigration Transition — U.S. Permanent Residency | United States

2015 – 2017

- Relocated from Canada to the United States following marriage. Not authorized to work in the U.S. during the permanent residency adjustment period.

Occupational Health, Safety, & Risk Manager, Various Companies

2000 – 2015

- Companies: Royal Caribbean, Tucker Energy Services, Unilever Caribbean, Unilever Bramalea (Toronto)
- Led operational risk assessments and compliance audits across manufacturing, maritime, and energy sectors, covering 3 vessels, 4 oil rigs, and 3 manufacturing facilities
- Conducted incident investigations, determined root causes, and developed corrective action plans that reduced recurrence by an estimated 33%
- Authored policies, procedures, and training programs adopted across 10 sites, improving compliance and reducing organizational risk
- Presented findings and recommendations to leadership and regulatory stakeholders, contributing to 14 consecutive quarters without major regulatory citations

TECHNICAL & SECURITY SKILLS

NIST CSF & RMF | ISO 27001 | Risk Assessment | Incident Investigation | Security Documentation | Governance, Risk, & Compliance (GRC) | Threat Analysis | Identity & Access Management (IAM) | Stakeholder Communication | Vulnerability Management | Root Cause Analysis | Qualys | Nessus

PRACTICAL PROJECTS

Risk Assessment Methodology — Developed a crosswalk between the Fine-Kinney risk scoring method and NIST 800-30, proposing Exposure as an explicit variable in GRC risk models; includes three OHS-based case studies applying the framework to real incident scenarios.

ISO 27001 / HIPAA / NIST CSF 2.0 Compliance Program (OccuSafe) — Built a full compliance program for OccuSafe, a case-study healthcare organization, mapping ISO 27001 controls to HIPAA safeguards and NIST CSF 2.0 functions.

PCI DSS v4.0 Compliance Program (PayGuard) — Designed a PCI DSS v4.0 compliance program for PayGuard, a case-study payment processor, covering control implementation and audit readiness.

SOC 2 Type II / HIPAA Audit Readiness (Carestream) — Built a SOC 2 Type II audit readiness assessment integrated with HIPAA requirements for Carestream, a case-study healthcare SaaS company.
